

**REMARKS**

Claims 3-9 are all the claims pending in this application. Claims 3, 5, 6, 7, and 8 have been rewritten in independent form. Claims 1 and 2 are herein cancelled. Now, all pending claims are in condition for allowance.

**I. Specification Objections**

The arrangement of the Specification is objected to. Applicant has amended the Specification of the instant application to correct the informalities. A new substitute Specification is provided. Applicant respectfully requests that the Specification objection be withdrawn.

**II. Claim Objections**

Claims 8 and 9 are objected to because of the following informalities: Claims 8 and 9 recite the active inductor circuit as (L'), where claims 8 and 9 depend from claim 1 where the active inductor circuit is named as (L).

Applicant herein corrects the informalities by deleting the unnecessary reference characters, and respectfully requests that the claim objections be withdrawn.

**III. Allowable Subject Matter**

Claims 3-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form.

Applicant has so rewritten claims 3, 5, 6, 7, and 8 in independent form, thus placing claims 3-9 in condition for allowance.

In view of the above, reconsideration and allowance of this application are now believed to be in order, and such actions are hereby solicited. If any points remain in issue which the
